## Design Development Report

### **Project Background and Description**

Transportation Services provides vehicles to faculty and staff for conducting University business. Rental vehicles are made available for University use, and include a variety of vehicle types including sedans, pick-ups, and vans. To assist in these services, Transportation Services performs maintenance and repair and provides refueling operations for all vehicles owned by the University of Nebraska-Lincoln. Additionally they service University vehicles housed in other parts of the state whenever possible. Transportation Services also services and maintains the buses in the campus transit fleet.

This project will replace the existing Transportation Services building that is in the path of the Antelope Valley Project. The proposed 20,880 gross square foot building will replace the existing automotive service facility and accommodate required space needs. The structure will provide 8 service bays for light and medium duty vehicles, two bus services bays, a body repair bay and paint booth, vehicle wash facility and parts inventory area. Offices and workspace are provided for administrative staff including a break area and employee changing rooms. Offices are also provided for Transit Services personnel.

The facility will replace fueling stations and vehicle parking and will provide space for transit bus parking. The proposed project will be located southwest of the intersection of 14<sup>th</sup> Street and Salt Creek on property recently purchased from the Lower Platte South Natural Resource District.
